Logging on to your sunset account

These instructions depend upon the fact that you have activated your sunset account.

If you were not in class last Wednesday and need help with this, ask for help at the beginning of class.

Note that this is a list of steps for logging in to a remote computer that is specific to our class today.

Take the following steps to login to your sunset account.

1. Click the Start button and type "putty" in the Search Programs and files text entry command box.
   
   You will see a list of programs installed on the computer named putty...

2. Click "putty" from the list that appears.
   
   The PuTTY application will begin and you will see the putty GUI as shown below:
3. Type sunset.olemiss.edu into the text entry box labeled "Host Name".

Note: Leave the other settings as you see them in the graphic.

For example: Port number at 22 and the Connection type at SSH.

4. Click the OPEN button.

If it is the first time you are connecting to this server, you will see this:

5. For our class, the server sunset is trusted, so we will click the YES button.
You will see this:

6. Type in your username and press enter. You will see this:

7. Enter your password and press enter. You will see this:

8. You have now successfully signed on to your account on sunset.

If you want to learn more about PuTTY..
