Graduate Work Evaluation Form

Name of Student: ________________________________________________________

Document Title: _________________________________________________________

Name of Reviewer: _________________________________________________________

Date: _____________________

In the questions below, the term "work" is meant to refer to a student's master's project, thesis, or Ph.D. dissertation. The "document" is the project writeup, thesis, or dissertation itself.

The following questions should be answered on a scale from 1 to 5, where 5 indicates "most difficult", "most useful" etc. as the question indicates. For simple statements, rate your agreement with the statement on the same scale, where 5 means "agree most strongly".

1. Rate the technical difficulty of this work relative to other work of the same
type (i.e. project, thesis, or dissertation).

2. Rate the usefulness of this work.

3. Rate the amount of implementation that this work represents relative to other
work of the same type (i.e. project, thesis, or dissertation).

4. Rate the theoretical or conceptual contribution of this work relative to other
work of the same type (i.e. project, thesis, or dissertation).

5. The work is technically sound.

6. The student has demonstrated the ability to use current appropriate computing
tools and techniques.

Ph.D Dissertation Only:

7. Rate the publish-ability of this work.
